

## Oulu University Hospital Enhances Leadership in Arrhythmia Care with Advanced Genesis Robotic Technology

January 14, 2025

ST. LOUIS, Jan. 14, 2025 (GLOBE NEWSWIRE) -- Stereotaxis (NYSE: STXS), a pioneer and global leader in surgical robotics for minimally invasive endovascular intervention, today announced that physicians at Oulu University Hospital in Finland have successfully treated the first patients using the advanced Genesis Robotic Magnetic Navigation (RMN) System from Stereotaxis.

Oulu University Hospital has significant experience pioneering the use of robotic technologies for the treatment of heart arrhythmias, having treated over 2,000 patients with original versions of the technology. The implementation of the latest Genesis System introduces significant advances in Robotic Magnetic Navigation technology to the northern regions of Finland. Robotic Magnetic Navigation introduces the benefits of robotic precision and safety to cardiac ablation, a common minimally invasive procedure to treat arrhythmias. Tens of millions of individuals worldwide suffer from arrhythmias — abnormal heart rhythms that result when the heart beats too quickly, too slowly, or with an irregular pattern. When left untreated, arrhythmias may significantly increase the risk of stroke, heart failure, and sudden cardiac arrest.

"For 15 years, advanced robotic technology has been essential to our team, allowing us to provide superior patient care for patients with complex cardiac arrhythmias," said Dr. Jarkko Magga, Cardiac Electrophysiologist at Oulu University. "We are pleased to continue to provide the highest quality patient care with the precision and stability offered by the more advanced Genesis System."

"We are proud to enhance and expand our partnership with Oulu University to ensure patients in Finland have access to leading cardiac care," said David Fischel, Chairman and CEO of Stereotaxis. "We look forward to continuing to support their successful and impactful robotic heart rhythm practice."

## About Stereotaxis

Stereotaxis (NYSE: STXS) is a pioneer and global leader in innovative surgical robotics for minimally invasive endovascular intervention. Its mission is the discovery, development and delivery of robotic systems, instruments, and information solutions for the interventional laboratory. These innovations help physicians provide unsurpassed patient care with robotic precision and safety, expand access to minimally invasive therapy, and enhance the productivity, connectivity, and intelligence in the operating room. Stereotaxis technology has been used to treat over 150,000 patients across the United States, Europe, Asia, and elsewhere.
