Stereotaxis Reports 2014 Second Quarter Financial Results

-Achieves Second Consecutive Quarter of Strong Recurring Revenue-Improves Operating Loss by 16% from First Half of 2013-Showcases Technologies at Preeminent Industry Events in Target Markets-Launches Ablation History for Improved Electrophysiology Procedures-Files FDA Application for Vdrive™ with V-CAS™ System -Hosts Conference Call Today at 4:30 p.m. Eastern Time-

ST. LOUIS, MO, August 4, 2014—Stereotaxis, Inc. (NASDAQ: STXS) today reported financial results for the second quarter ended June 30, 2014.

"We have made meaningful progress with our strategies to bring our technology to new markets, build on the class-leading performance of our robotic platform through continued innovations and better align our clinical training and adoption programs with customer goals," said William C. Mills, Stereotaxis Chief Executive Officer. "As a measure of customer confidence and proficiency in product application, we achieved a second consecutive quarter of robust recurring revenue of nearly \$7 million. We continue to believe in the strengths of our new market opportunities, ongoing product advancements and growing clinical validation to drive system and procedure growth well above levels we have experienced in recent quarters."

"We are pleased to report a productive quarter for our initial marketing efforts in Japan," Mr. Mills continued. "With increasing visibility of our *Niobe*® ES Magnetic Navigation System, we are seeing more evidence of the intrinsic desire of Japanese physicians to improve patient care and clinical outcomes through new technologies. We recently concluded a very positive presentation at the annual meeting of the Japanese Heart Rhythm Society, where we experienced significant interest in the benefits of our *Niobe* ES platform. Our Japanese distributors continue to engage targeted physicians and medical centers in active dialogue, while preparing our remaining product lines for market approval."

"In the U.S., we are successfully executing our regulatory strategy for the $Vdrive^{TM}$ Robotic Navigation system," said Mr. Mills. "During the quarter, we submitted premarket notifications to the Food and Drug Administration for our $V-Loop^{TM}$ Variable Loop Catheter Manipulator and $V-CAS^{TM}$ Catheter Advancement System, both of which support improved workflow for the single-operator user of the Niobe ES system."

"Also during the second quarter, we upgraded approximately a dozen of our customer sites with Ablation History, a new intraoperative mapping feature of our *Niobe* system user interface which we premiered at the U.S. Heart Rhythm Society session in May. While still early in our experience, we are very encouraged by the strong anecdotal evidence of improved procedure times and first pass isolation rates by physicians in just over 250 ablations performed with Ablation History."

"As we continue to expand our product capabilities for optimal user experience and clinical outcomes, we remain focused on driving improved commercial success and ensuring our financial flexibility to take advantage of the substantial growth opportunities ahead," Mr. Mills concluded.
