ST. LOUIS, MO, February 22, 2016—Stereotaxis, Inc. (NASDAQ: STXS), a global leader in innovative technologies for the treatment of cardiac arrhythmias, today reported financial results for the fourth quarter and full year ended December 31, 2015.

"We finished the year on a strong note, achieving new capital orders of \$5.1 million in the fourth quarter and our first ever positive free cash flow quarter of \$1.6 million, which helped drive a 71% reduction in cash burn for the full year," said William C. Mills, Stereotaxis Chief Executive Officer. "New capital orders in the fourth quarter included two Niobe[®] ES system orders in Japan, where we see continued progress and momentum. For the full year, we grew total revenue 8% compared to 2014 and increased systems revenue 36% year over year on seven new *Niobe* ES systems and several upgraded sites, compared to three *Niobe* system shipments last year.

"Our improved commercial results reflect progress with our ongoing initiatives to increase awareness of the outstanding clinical efficacy, efficiency, and safety of our technology compared to manual modalities across the spectrum of complex ablation cases. Supported by a growing body of independent clinical evidence on the higher acute success, lower recurrence rates, and improved safety when using our magnetic navigation platform for the treatment of ventricular tachycardia (VT), these procedures have become our growth leader. In the fourth quarter, VT procedures increased 28% year over year.

"With an estimated 60,000 VT procedures performed worldwide and growing at over 10% each year, we believe the VT market currently represents a nearly \$100 million market opportunity for the Company on an annual basis. Last month, we announced the initiation of our first prospective, randomized clinical trial at prominent VT centers of excellence to definitively establish our superiority in long-term patient outcomes versus manual catheter approaches. We believe we are well positioned to become the standard of care for VT and to capitalize on this position as part of our overall growth plans," Mr. Mills concluded.

Fourth Quarter 2015 Financial Results

Revenue for the fourth quarter of 2015 totaled \$9.2 million, a 6% decline from \$9.8 million in the prior year fourth quarter and down slightly from \$9.3 million on a sequential basis. Systems revenue was \$2.4 million, down 24% from \$3.2 million in the prior year quarter but up 5% sequentially from \$2.3 million in the third quarter. During the fourth quarter, the Company recognized revenue of \$1.4 million on one *Niobe* ES system and two *Niobe* ES upgrades, \$0.2 million on three Vdrive[®] robotic navigation systems and \$0.8 million in Odyssey[®] solution sales. Recurring revenue was \$6.8 million in the fourth quarter, compared to \$6.6 million in the prior year quarter and \$7.0 million in the third quarter. Total procedures declined 5% year over year, partially offset by a 28% increase in VT procedures.

The Company generated new capital orders of \$5.1 million on three *Niobe* ES system orders and three upgrades, two *Vdrive* systems and five *Odyssey* solution orders, compared to \$2.9 million in the prior year fourth quarter and \$3.1 million in the third quarter. Ending capital backlog for the 2015 fourth quarter was \$6.0 million.

Gross margin in the quarter was \$6.8 million, or 73.7% of revenue, versus \$7.5 million, or 76.6% of revenue, in the fourth quarter of 2014 and \$6.8 million, or 73.6% of revenue, in the third quarter of 2015. Operating expenses in the fourth quarter were \$8.2 million, an increase over \$7.2 million in the prior year quarter and \$7.7 million in the third quarter, partially due to \$0.6 million of one-time non-cash charges related to intangible assets and stock-based compensation.

Operating loss in the fourth quarter was \$(1.4) million, compared to operating income of \$0.3 million in the prior year fourth quarter and an operating loss of \$(0.9) million in the third quarter. Interest expense was \$0.8 million in all four quarters of the year.

Net loss for the 2015 fourth quarter was \$(1.7) million, or \$(0.08) per share, compared to net income of \$0.9 million, or \$0.04 per share, reported in the fourth quarter of 2014. Excluding mark-to-market warrant revaluation, the Company would have reported a net loss of \$(2.2) million, or \$(0.10) per share, for the 2015 fourth quarter, compared to a net loss of \$(0.5) million, or \$(0.03) per share, for the 2014 fourth quarter. The weighted average diluted shares outstanding for the fourth quarters of 2015 and 2014 totaled 21.5 million and 20.6 million, respectively.

The Company had free cash flow of \$1.6 million during the quarter, compared to cash burn of \$1.4 million in the year ago quarter and less than \$0.1 million in the third quarter.
