Section 1 – Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

This Specialized Disclosure Report on Form SD (“Form SD”) of Stereotaxis, Inc. (“Stereotaxis”, the “Company” or “we”) for the reporting period from January 1 to December 31, 2023, is filed pursuant to Rule 13p-1 under the Securities Exchange Act of 1934 (the “Rule”). Capitalized terms not otherwise defined herein are defined in the Rule.

Stereotaxis evaluated its products and determined that our products contain “necessary conflict minerals.” This means that Conflict Minerals as defined in the Rule are present in products we manufacture or contract to manufacture and are used to achieve the required function, use or purpose of those products. Our determination and related disclosures relating to such necessary conflict minerals are included in Stereotaxis’ Conflict Minerals Report and are incorporated by reference herein.

Item 1.02 Exhibit

The Company has filed a Conflict Minerals Report as Exhibit 1.01 to this Form SD. Stereotaxis’ Conflict Minerals Report is available at <http://www.stereotaxis.com/legal/>. The website and the information accessible through it are not incorporated into this Form SD.

Section 2 - Exhibits

Item 2.01 Exhibits

Exhibit 1.01 [Stereotaxis, Inc. Conflict Minerals Report for the reporting period January 1 to December 31, 2023](#)

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

STEREOTAXIS, INC.

(Registrant)

Name: Laura Spencer Garth

Title: General Counsel & Corporate Secretary

May 30, 2024

(Date)

Stereotaxis, Inc.
Conflict Minerals Report
For The Year Ended December 31, 2023

Introduction

This Conflict Minerals Report for Stereotaxis, Inc. (“Stereotaxis”, “we,” “us,” and “our”) is for the period from January 1 to December 31, 2023 and is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934 (“Rule”). Terms used in this report are defined in the Rule and Form SD. Refer to those sources and to SEC Release No. 34-67716 issued by the Securities and Exchange Commission on August 22, 2012 for such definitions.

Stereotaxis designs, manufactures and markets robotic systems, instruments and information systems for the interventional laboratory. Our proprietary robotic technology, Robotic Magnetic Navigation (“RMN”), fundamentally transforms endovascular interventions using precise computer-controlled magnetic fields to directly control the tip of flexible interventional catheters or devices. Direct control of the tip of an interventional device, in contrast to all manual hand-held devices that are controlled from their handle, can improve the precision, stability, reach and safety of these devices during procedures.

Our primary products include the *Genesis RMN* System, the *Odyssey* Solution, and other related devices. Through our strategic relationships with fluoroscopy system manufacturers, providers of catheters and electrophysiology mapping systems, and other parties, we offer our customers x-ray systems and other accessory devices.

The *Genesis RMN* System is designed to enable physicians to complete more complex interventional procedures by providing image-guided delivery of catheters through the blood vessels and chambers of the heart to treatment sites. This is achieved using externally applied magnetic fields that govern the motion of the working tip of the catheter, resulting in improved navigation, efficient procedures, and reduced x-ray exposure.

The *Odyssey* Solution consolidates lab information onto one large integrated display, enabling physicians to view and control all the key information in the operating room. This is designed to improve lab layout and procedure efficiency. The system also features a remote viewing and recording capability called *Odyssey Cinema*, which is an innovative solution that delivers synchronized content for optimized workflow, advanced care, and improved productivity. This tool includes an archiving capability that allows clinicians to store and replay entire procedures or segments of procedures. This information can be accessed from locations throughout the hospital local area network and over the global *Odyssey* Network providing physicians with a tool for clinical collaboration, remote consultation, and training.

We have arrangements with fluoroscopy system manufacturers to provide such systems in a bundled purchase offer for hospitals establishing robotic interventional operating rooms. These are single-plane, full-power x-ray systems and include the c-arm and powered table. The combination of RMN Systems with our partnered x-ray systems reduces the cost of acquisition, the ongoing cost of ownership, and the complexity of installation of a robotic electrophysiology practice.

This Report describes the process and results of Stereotaxis’ Conflict Minerals program. Stereotaxis performed a Reasonable Country of Origin Inquiry (RCOI) to determine the source of necessary conflict minerals in our products, and in accordance with the Rule then undertook due diligence measures on the source and chain of custody of those necessary conflict minerals. The purpose of this due diligence was to determine if any of the necessary conflict minerals originated from the Democratic Republic of the Congo (“DRC”) or an adjoining country (collectively defined as the “Covered Countries”) and may not have come from recycled or scrap sources, to determine whether such products are “DRC conflict free.”

Consistent with the provisions of the Rule, this Conflict Minerals Report has not been audited by an independent private sector auditor.

Design of Conflict Minerals Program and Due Diligence Process

Stereotaxis has a Conflict Minerals program designed to be in conformance with the Organisation for Economic Co-operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, 3rd Edition, including the Supplement on Tin, Tantalum and Tungsten, and the Supplement on Gold (collectively, the “OECD Guidance”). In the context of the OECD Guidance Stereotaxis is a “downstream company” in the conflict minerals supply chain. Summarized below are the five due diligence steps taken which align with the OECD Guidance five-step framework:

1. Maintained a strong company management system:
 - a) We have a Conflict Minerals Policy. It can be found on our website at <http://www.stereotaxis.com/legal/>.
 - b) We have an internal cross-functional Conflict Minerals team that oversees the implementation of our Conflict Minerals program. The status of our Conflict Minerals program is reviewed with senior management. We maintain records relating to our Conflict Minerals program.
 - c) We have a system of controls and transparency over our supply chain using the industry-standard Conflict Minerals Reporting Template (“CMRT”), which is a supply chain survey designed to identify the maturity of our suppliers’ conflict minerals programs and identify the smelters and refiners that process the necessary conflict minerals contained in their products.
 - d) We have informed our suppliers of our company policy, and our commitment to be DRC conflict free. Where suppliers are unaware of conflict minerals regulations or have an immature process, we seek to educate them.
 - e) We have a company-level grievance mechanism whereby anyone can confidentially call or email a concern or report a violation of a policy. Refer to the Stereotaxis Code of Conduct Handbook in the Ethics and Commitment section of our website at <http://www.stereotaxis.com/legal/>.
 2. Identified and assessed risks in the conflict minerals supply chain:
 - a) We identified conflict minerals risks in our supply chain:
 - We identified all direct suppliers that supply us with products that might contain Conflict Minerals intentionally added and necessary for the functionality of those products.
 - We conducted a Reasonable Country of Origin Inquiry (RCOI) with relevant suppliers of parts and materials used in products manufactured by Stereotaxis.
 - We requested our direct suppliers provide us with a completed industry-standard CMRT. The CMRT includes a section identifying evidence of an active corporate conflict minerals program/policy by each respective supplier, as well as a list of Smelters or Refiners in the supplier’s conflict mineral supply chain.
 - We followed up with unresponsive suppliers, making multiple attempts to obtain information.
 - We reviewed CMRT’s and any other documentation provided by our suppliers for completeness and reasonableness. We categorized suppliers according to the responses provided.
 - b) We assessed risks of adverse impacts by actively working to discontinue sourcing products from upstream suppliers when we identified a reasonable risk that they are sourcing from, or linked to any party committing serious abuses, consistent with Annex II of the OECD Guidance.
 3. Designed and implemented a strategy to respond to identified risks:
 - a) We identified the results of our RCOI and identified high risk suppliers to senior management.
 - b) We have a risk management plan that includes seeking to reduce or eliminate high risk suppliers.
 - c) We have an ongoing risk reduction and management program, which includes a goal that all future product designs are DRC conflict free, periodically reviewing and updating the conflict minerals status of our existing products and striving over time to reduce or eliminate non-conflict-free minerals from the supply chain.
 - d) We monitored, and will continue to monitor changes in supplier conflict minerals status, as circumstances change with suppliers and as conflict minerals status ripples through the supply chain to end item manufacturers such as Stereotaxis.
-

4. Carried out independent third-party audit of supply chain due diligence at identified points in the supply chain:
 - a) We engage a third-party which has a comprehensive Verification, Outreach and Due Diligence Process which provides us with detailed information and audit results related to the smelters or refiners in our supply chain.
5. Reported on supply chain due diligence:
 - a) We publicly communicated our Conflict Minerals Sourcing Policy on our company website at <http://www.stereotaxis.com/legal/>.
 - b) We publicly disclosed this Conflict Minerals Report on our company website at <http://www.stereotaxis.com/legal/>.
 - c) As allowed by the Rule, obtaining an independent private sector audit of this Report was not required.

The content of any website referred to in this Report is included for general information only and is not incorporated by reference in this Report.

Reasonable Country of Origin Inquiry Results

Following the Conflict Minerals program described above, Stereotaxis identified 165 suppliers and original equipment manufacturers in our direct supply chain. We identified 128 of those suppliers as the ones who provide us with components, materials and assemblies where Conflict Minerals are present and necessary to functionality, or for which we were unsure whether the materials or components contained Conflict Minerals. We performed a RCOI with 114 suppliers and requested each of them to supply us with a CMRT. 61 of those suppliers provided us with a CMRT.

The CMRT's we received contained a large number of smelter or refiner names for the facilities these suppliers and their upstream suppliers use to process Conflict Minerals, as well as the specific Conflict Mineral(s) used in their products. After correction, review, and removal of duplicate or alternate names, and elimination of entities we determined were not actually smelters or refiners, and elimination of entities for which we were unable to determine if they were a relevant smelter or refiner, we identified 354 unique smelters.

Stereotaxis expects our suppliers to provide CMRTs that represent their good faith effort to document their supply chain. We do not audit our supplier's process for doing RCOI, due diligence, or correctly reporting smelters in their supply chain. Therefore, the Stereotaxis smelter list, which is derived from all our supplier's smelter lists, could contain inaccuracies as a result. As nearly all of our suppliers report their supply chain at a company, and not at the product level, they may be reporting to Stereotaxis smelters or refiners that are not in the supply chain for the actual products that Stereotaxis procures from them, leading to the potential for identifying smelters or refiners that are not actually in our supply chain for the products we procure.

Of the 354 identified smelters or refiners in our supply chain, our analysis leads us to believe that:

- 49 smelters are known to source, or there is reason to believe they may source, Conflict Minerals from the Covered Countries.
- 71 smelters have unknown countries of origin for their minerals, and additionally are not certified as conformant. Therefore, we cannot, at this time, determine whether or not any of those smelters might have sourced Conflict Minerals from the Covered Countries.

In accordance with the SEC final rules for Conflict Minerals sourced from Covered Countries, because some smelters in our supply chain were identified to be sourcing from Covered Countries, Stereotaxis is required to exercise, and has exercised, due diligence on the Conflict Minerals' source and chain of custody. Additionally, Stereotaxis is required to follow, and has followed, a nationally or internally recognized due diligence framework (specifically the OECD Guidance) and report the results thereof in a Conflict Minerals report.

Due Diligence Process Results

Of the 49 smelters in our supply chain that are known to source Conflict Minerals from the Covered Countries, Stereotaxis' due diligence review indicates:

- 43 smelters have active certifications, or are in the process of renewing their certification as a conformant smelter by the Responsible Minerals Initiative (RMI) Responsible Minerals Assurance Process (RMAP). In addition, 6 of these 43 smelters also have London Bullion Market Association (LBMA) Responsible Gold Certifications.
- 2 Tin smelters are in the RMAP certification process, but not yet certified.
- 4 smelters do not have conflict-free certifications, and we have no knowledge that they are pursuing certification at this time.

Based upon responses received from our suppliers as part of RCOI, and our due diligence efforts, we have not been able to confirm that all smelters reported by our suppliers as being in our supply chain are DRC conflict-free.

Stereotaxis did not discontinue business with any supplier simply because the supplier sourced conflict minerals from the Covered Countries. We support conflict-free minerals trade in the DRC region.

Product Determination

Based upon responses received from our suppliers as part of RCOI, we have not been able to confirm the identification of all smelters in our supply chain, nor confirm that all smelters reported by our suppliers as being in our supply chain are DRC conflict-free.

Facility and Mine Information

The table below identifies the smelter or refiner facilities which, to the extent known as a result of our RCOI, may have processed the necessary conflict minerals contained in our products. A "Yes" entry in the rightmost column indicates the smelter or refiner has received a conformant smelter designation from an independent third-party audit program.

(*) Multiple direct suppliers reported the presence of this entity (African Gold Refinery, CID003185) ("AGR") that was sanctioned on March 17, 2022 by the United States Department of Treasury, Office of Foreign Assets Control. Because of the over-reporting nature of the industry CMRT information collection process, including near-universal reporting at the company level as opposed to at the product level, and the nature of the supply chains and goods, we are unable to confirm this, or any, smelter or refiner is or was active in our supply chain. Stereotaxis has also not identified any direct transactions or contractual relationships with AGR. Stereotaxis is in the process of contacting the applicable suppliers regarding next steps, remediation and/or disengagement procedures from AGR. To date, Stereotaxis has not received confirmation from any of its suppliers that they utilized AGR in the products provided to Stereotaxis, and Stereotaxis will continue to work with its supply base to ensure compliance with all applicable sanction laws.

Smelters or Refiners That Sourced from the Covered Countries

The table below lists the smelter or refiner facilities which, to the extent known, processed the necessary conflict minerals in our products or products produced by companies in our supply chain that were sourced from the Covered Countries, and hence were subject to due diligence.

The Conflict-Free Certification designations in the table are:

- **LBMA:** The smelter has obtained a Responsible Gold Certification from the London Bullion Market Association (LBMA).
- **RMAP:** The smelter has an active certification or is in the process of renewing their certification as a conformant smelter in the Responsible Minerals Assurance Process (RMAP) from the Responsible Minerals Initiative (RMI).
- **RMAP-Active:** The smelter is actively moving through the RMAP certification process.

Country of Origin

The countries of origin of the Conflict Minerals processed by the smelters and refiners that may be in our supply chain include the following countries:

Gold:

Argentina; Armenia; Australia; Austria; Belgium; Bermuda; Bolivia; Brazil; Burundi; Cambodia; Canada; Chile; China; Colombia; Congo (Brazzaville); Czech Republic; Djibouti; DRC- Congo (Kinshasa); Ecuador; Egypt; Estonia; Ethiopia; Finland; France; Germany; Ghana; Guinea; Guyana; Hong Kong; Hungary; India; Indonesia; Ireland; Israel; Italy; Ivory Coast; Japan; Jersey; Kazakhstan; Korea, Republic of; Kyrgyzstan; Laos; Luxembourg; Madagascar; Malaysia; Mali; Mexico; Mongolia; Mozambique; Myanmar; Namibia; Netherlands; New Zealand; Niger; Nigeria; Papua New Guinea; Peru; Philippines; Poland; Portugal; Russian Federation; Rwanda; Saudi Arabia; Sierra Leone; Singapore; Slovakia; South Africa; Spain; Suriname; Sweden; Switzerland; Taiwan; Tajikistan; Tanzania; Thailand; Turkey; United Arab Emirates; United Kingdom; United States; Uzbekistan; Viet Nam; Zambia; Zimbabwe.

Tantalum:

Angola; Argentina; Australia; Austria; Belarus; Belgium; Bolivia; Brazil; Burundi; Cambodia; Canada; Central African Republic; Chile; China; Colombia; Congo (Brazzaville); Czech Republic; Djibouti; DRC- Congo (Kinshasa); Ecuador; Egypt; Estonia; Ethiopia; France; Germany; Ghana; Guinea; Guyana; Hungary; India; Indonesia; Ireland; Israel; Italy; Ivory Coast; Japan; Jersey; Kazakhstan; Kenya; Korea, Republic of; Laos; Luxembourg; Madagascar; Malaysia; Mali; Mexico; Mongolia; Mozambique; Myanmar; Namibia; Netherlands; Niger; Nigeria; Peru; Philippines; Poland; Portugal; Russian Federation; Rwanda; Sierra Leone; Singapore; Slovakia; South Africa; South Sudan; Spain; Suriname; Switzerland; Taiwan; Tanzania; Thailand; Uganda; United Kingdom; United States; Viet Nam; Zambia; Zimbabwe.

Tin:

Angola; Argentina; Armenia; Australia; Austria; Belgium; Bolivia; Brazil; Burundi; Cambodia; Canada; Central African Republic; Chile; China; Colombia; Congo (Brazzaville); Czech Republic; Djibouti; DRC- Congo (Kinshasa); Ecuador; Egypt; Estonia; Ethiopia; France; Germany; Guyana; Hong Kong; Hungary; India; Indonesia; Ireland; Israel; Ivory Coast; Japan; Jersey; Kazakhstan; Kenya; Korea, Republic of; Kyrgyzstan; Laos; Luxembourg; Madagascar; Malaysia; Mexico; Mongolia; Morocco; Mozambique; Myanmar; Namibia; Netherlands; Nigeria; Papua New Guinea; Peru; Philippines; Poland; Portugal; Russian Federation; Rwanda; Sierra Leone; Singapore; Slovakia; South Africa; South Sudan; Spain; Suriname; Sweden; Switzerland; Taiwan; Tanzania; Thailand; Turkey; Uganda; United Kingdom; United States; Uzbekistan; Viet Nam; Zambia; Zimbabwe.

Tungsten:

Angola; Argentina; Australia; Austria; Belgium; Bolivia; Brazil; Burundi; Cambodia; Canada; Central African Republic; Chile; China; Colombia; Congo (Brazzaville); Czech Republic; Djibouti; DRC- Congo (Kinshasa); Ecuador; Egypt; Estonia; Ethiopia; France; Germany; Guinea; Guyana; Hungary; India; Indonesia; Ireland; Israel; Ivory Coast; Japan; Kazakhstan; Korea, Republic of; Laos; Luxembourg; Madagascar; Malaysia; Mexico; Mongolia; Mozambique; Myanmar; Namibia; Netherlands; Niger; Nigeria; Papua New Guinea; Peru; Philippines; Portugal; Russian Federation; Rwanda; Sierra Leone; Singapore; Slovakia; South Africa; South Sudan; Spain; Suriname; Switzerland; Taiwan; Tanzania; Thailand; Uganda; United Kingdom; United States; Viet Nam; Zambia; Zimbabwe.

Steps to be Taken to Mitigate Risk

Stereotaxis plans to continue to work with our suppliers as deemed appropriate to help them understand and satisfy our conflict-free and reporting expectations. We will continue to monitor the progress of suppliers which report to be sourcing from non-conformant smelters believed to source conflict minerals from the Covered Countries, work to improve supplier response rates, and continue to evolve our internal due diligence determination process.

Additional Risk Factors

Our conflict minerals disclosure is made in good faith and based on our best efforts. However, other factors could have led to errors in the disclosure. They include, but are not limited to gaps in supplier data, suppliers providing data at the company level as opposed to at the product level, error in supplier knowledge, gaps in smelter auditing processes, errors in public data, errors in language translation, and delays in reporting data through the lengthy supply chain that exists between the upstream smelters or refiners and Stereotaxis as an end-item manufacturer. This Specialized Disclosure Report on Form SD contains forward looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements include any plans or intentions to improve the number and quality of supplier response rates and steps we intend to take to mitigate risk in our supply chain. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected. In particular, Stereotaxis' actions and the results of those actions may be affected by: (a) changes in global regulations related to the extraction of and disclosure obligations related to Conflict Minerals; (b) the ability of our direct suppliers to provide accurate information in response to our requests; (c) the availability of alternate sources of materials necessary to the functionality or production of our products on commercially reasonable terms or at all; (d) the ability of certified smelters to meet demand for raw materials; and (e) limits on our ability to unilaterally influence supplier behavior. These forward-looking statements are made as of the date hereof, and Stereotaxis assumes no obligation to update such statements.
